

# Patient Portal

The WebPT Patient Portal allows your therapist to create and share Home Exercise Program routines with you throughout your course of care. Take a look at these portal highlights. To use the portal, make sure you provide your email address to the front desk.

## Easy Setup

When your therapist creates your routine in the Patient Portal, you'll automatically receive an email with your access code. Simply click the **View My Care Plan** button, add your email address and password to create an account, and then enter your **Access Code** and **Date of Birth**.

## Access Anywhere

The Patient Portal is completely responsive and can be accessed from your browser on any device: computer, tablet, or mobile phone. Your routine travels wherever you do.

## Recover Faster

With video-based instructions, you'll never forget how to perform an exercise again. Plus, you'll always know how often each exercise should be performed, including sets, reps, duration, and more.

## Stay Connected

Questions? Concerns? Chat your therapist directly from the Patient Portal. Completely secure and HIPAA compliant, you don't have to wait until your next visit to get the answers you need.

## Track Progress

Gain points for setting goals, tracking workouts, and communicating with your healthcare provider. Set a target point total for your week and always make sure you're staying on track with your recovery plan.
